

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claim 1 (cancelled)

Claims 2-11 (new)

1. (Cancelled) A computer system including a first computer with a first display, a control site computer, and a second computer, wherein said first, control site, and second computers are coupled together through a computer network, said computer system comprising:
 - a selector for selecting a region on the first display;
 - a first transmitter coupled to the first computer for transmitting an image associated with said region to the control site computer;
 - a second transmitter coupled to the control site computer for transmitting said image to the second computer; and
 - a display coupled to the second computer for displaying the image on the second computer.
2. (New) A method for collaborative web browsing by a first computer with a first display and a second computer with a second display, through a control site computer wherein the first, control site and second computers are coupled

together through a data communication means and said second computer executes a browser application, said method steps comprising:

selecting a desired region on the display of a first computer, said desired region including at least one of a specific window on said first display, a currently active window on said display, a window associated with a currently executing application program or the entire display;

capturing the desired region from the display of the first computer as an image;

transmitting the image to one or more of said second computer through the control site computer;

displaying the image on the display of the one or more second computers

3. (New) The method of claim 2, wherein the data communication means is a computer data network.
4. (New) The method of claim 3, wherein the network is the Internet
5. (New) The method of claim 2, wherein the first and control site computers are the same computer.
6. (New) The method of claim 2, further including composing a URL for each of the received images.
7. (New) The method of claim 2, further including composing a URL for each of the selected regions.

8. (New) The method of claim 2, wherein the selecting a region on the first computer display comprises pressing a combination of keys on the keyboard of said first computer.
9. (New) The method of claim 2, wherein the selecting a region on the first computer display comprises defining a border rectangle with a pointing device.
10. (New) The method of claim 2, wherein the selecting a region on the first computer display comprises selecting from a list of currently executing application programs, where each currently executing application program in said list is associated with a window.
11. (New) The method of claim 2, wherein the first computer automatically retransmits an updated image of said region to said control site computer.
